Didactic: Colorectal Cancer (CRC) 101

Learning objectives

1. Describe Colorectal Cancer (CRC)

2. Describe the causes of CRC

3. Describe the risk factors for CRC

4. Describe the signs and symptoms of CRC

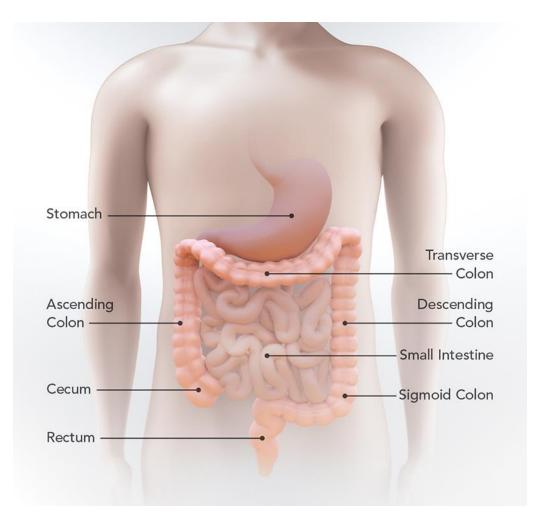

Have a question? Don't wait to ask! Feel free to enter in the Chat at any time.

11

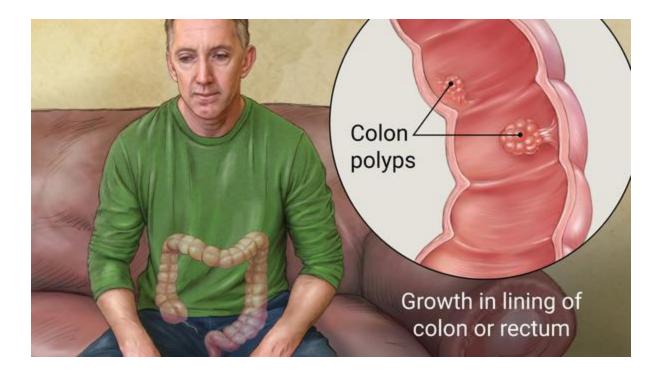

Anatomy of the gastrointestinal (GI) track

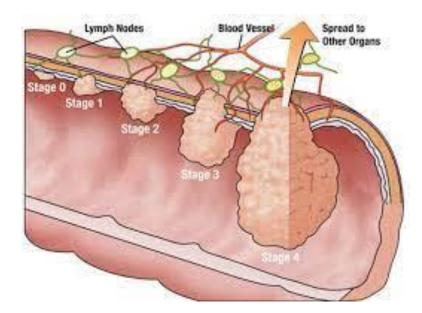

What is Colorectal Cancer (CRC)

 A disease where abnormal growths in the colon or rectum called *polyps* may grow out of control and become cancerous.

Causes of Colorectal Cancer (CRC)

Personal habits and behavior that may contribute to CRC:

- Lack of regular physical exercise
- A diet low in fruit and vegetables
- A low-fiber and high-fat diet or a diet high in processed meats
- Being overweight
- Alcohol consumption
- Tobacco use

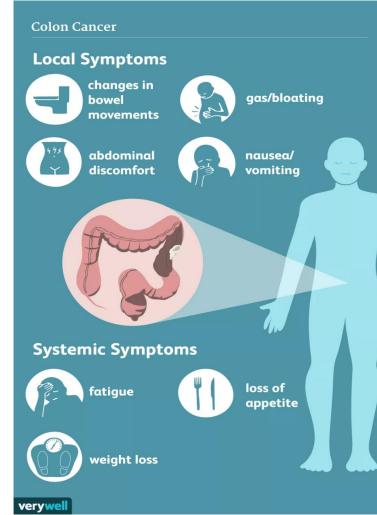

Other risk factors for CRC include:

- Older age
- Inflammatory bowel diseases as Crohn's disease or ulcerative colitis
- A personal or family history of colorectal cancer or colorectal polyps
- Certain genetic conditions
- Diabetes
- Race

Signs and symptoms of CRC

- A change in bowel habits.
- Blood in or on your stool (bowel movement).
- Diarrhea, constipation, or feeling that the bowel does not empty all the way.
- Abdominal pain, aches, or cramps that don't go away.
- Weight loss and you don't know why.

Arizona Cancer Prevention and Control Research Network/ University of Arizona

Session 1 Scenario Presentation

Session 1 Scenario

Provided by: Adriena Hernandez Focus: Patient-Related

Patient Hx

- Hispanic male
- 35 years old
- Symptoms: blood in stool, irregular bowel habits (changing between diarrhea & constipation), abdominal pain, unexplained weight loss
- Expressed his concerns to multiple doctors
- No family or personal history of cancer or polyps
- Was eventually diagnosed with stage 3 colorectal cancer

Barriers/Challenges

- Doctors were not referring him for any diagnostic tests
- He did not meet CRC screening recommendation guidelines
- He did not meet our study eligibility criteria
- Providers were hesitant to provide him a FIT Kit

Lessons Learned

- Hosting the community event
 with donated FIT Kits and doctors
 present allowed for flexibility in
 distribution
- Event was beneficial to the patient
- Younger people are being diagnosed with colorectal cancer
- We need to raise awareness of the risks of CRC among adults younger than 45

Session 1 Scenario Provided by: Adriena Hernandez Focus: Patient-Related

Discussion & Question

1) How would you advocate for patients who do not meet colorectal screening recommendations but are experiencing symptoms and want to be checked for CRC?

2) How can we better raise awareness about CRC in Arizona for adults 45+ and for younger adults?

Lessons Learned

- Hosting the community event with donated FIT Kits and doctors present allowed for flexibility in distribution
- Event was beneficial to the patient
- Younger people are being diagnosed with colorectal cancer
- We need to raise awareness of the risks of CRC among adults younger than 45
